

Nojomo Justice Sibisi

Software Developer | .NET | Laravel React

justicesibisi@outlook.com | 069 389 8541 | Johannesburg, Gauteng | github.com/Justicesibisi

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in .NET (C#, ASP.NET MVC) and Laravel (PHP, Livewire), building enterprise-grade web applications across multi-role environments. Background spans fintech, asset management, and UI/UX systems. Transitioned into software development from a client-facing financial services career, bringing strong analytical thinking, stakeholder communication, and problem-solving skills. Oracle Certified Java SE 8 Programmer, Microsoft Azure Fundamentals (AZ-900) certified, and ALX Software Engineering graduate.

PROFESSIONAL EXPERIENCE

Software Developer | SpecCon Holdings

January 202 – Present (Contract)

- Developed role-based access control supporting five user roles including Admins, Course Managers, Content Developers, Reviewers and Viewers.
- Designed Firestore database schema to store course text content including introductions, unit descriptions, questions and answers per unit, and final exam content.
- Integrated SharePoint URL references for media assets including videos and audio files, keeping Firebase lean while maintaining full resource traceability.
- Built a dashboard to surface missing course components and track progress per course from idea stage through to final delivery.
- Implemented course status tracking for LMS conversion pipeline, monitoring migration progress from Moodle to a custom LMS.
- Developed a checklist-driven workflow enabling content teams to identify and complete missing course components before publishing.

Software Developer (.NET Consultant) | Sampira

September 2025 – December 2025 (Contract) Remote / Johannesburg

- Engineered workflow modules for asset requests, approvals, and incident reporting across multiple departments using ASP.NET MVC clean architecture.
- Built multi-role access control system supporting Employees, Managers, Administrators, Finance, and HR with secure C# backend logic and API endpoints.
- Optimized SQL stored procedures for inventory, incident, and approval reporting improved data retrieval performance by 40%.
- Built Razor Pages with Data Tables, server-fetched JSON data, export options, and UI customization for audit-ready reporting.
- Improved reliability of JSON-based API communication between modules, reducing data mismatch errors.
- Documented system features, data models, controller endpoints, and approval flow to streamline onboarding for new developers.

Software Developer | Ecoosty

March 2025 – August 2025 Woodmead, South Africa

- Implemented Laravel Livewire authentication flows including password reset logic and real-time form handling.
- Migrated legacy UI components to a fully responsive, utility-first design system while preserving controller functionality.
- Ensured cross-device compatibility and maintained clean, component-driven full stack code adhering to modern Laravel conventions.
- Collaborated closely with the team on form-based features with server-side validation and Livewire reactive updates.

Financial Consultant | Old Mutual

May 2023 – March 2024 Tembisa, South Africa

- Conducted financial needs analyses and recommended investment strategies aligned to client risk profiles and goals.
- Consistently met and exceeded sales targets through networking, referrals, and long-term relationship building.
- Provided ongoing portfolio reviews and proactive client support in compliance with regulatory requirements.

Call Centre Agent | Nedbank

June 2019 – May 2022 Johannesburg, South Africa

- Handled high-volume inbound banking queries, resolving account issues within SLA targets with a strong customer satisfaction record.
- Identified cross-sell and upsell opportunities, contributing to revenue generation while maintaining compliance standards.
- Collaborated across departments to resolve complex customer cases and escalate appropriately.
