Career Highlights

Software Developer with commercial experience building enterprise web applications using .NET (C#, ASP.NET MVC) and Laravel (PHP, Livewire). Background spans fintech, asset management and education technology. Transitioned into software development from a financial services career, bringing strong analytical thinking, documentation skills and stakeholder communication. Oracle Certified Java SE 8 Programmer and Microsoft Azure Fundamentals (AZ-900) certified.

Currently building a React and Firebase course management system for 300+ tech courses with role-based access control, dashboard reporting and LMS migration tracking.

Core Technical Skills

Backend

C#, ASP.NET MVC, .NET Core, PHP, Laravel, Livewire, RESTful APIs, Java

Frontend

React, Razor Pages, HTML, CSS, JavaScript, DataTables

Database

SQL Server, Firebase Firestore, Stored Procedures, Query Optimization

DevOps & Tools

Azure DevOps, Git, GitHub, Microsoft 365, SharePoint, Shell Scripting

Methodologies

Agile, Clean Architecture, OOP, MVC, Component-driven Development

Soft Skills

Analytical thinking, technical documentation, stakeholder communication, teamwork

Experience

Software Developer

SpecCon Holdings | January 2026 – Present | Contract | Centurion

- Built a full-stack course tracking system using React and Firebase Firestore for a catalogue of 300+ tech courses.
- Developed role-based access control supporting five user roles including Admins, Course Managers, Content Developers, Reviewers and Viewers.
- Designed Firestore schema to store course content including unit descriptions, questions and answers per unit.
- Integrated SharePoint URL references for media assets keeping Firebase lean while maintaining full resource traceability.
- Built a dashboard to surface missing course components and track progress per course from idea to final delivery.

- Implemented LMS conversion pipeline status tracking monitoring migration progress from Moodle to a custom platform.

Software Developer (.NET Consultant)

Sampra | September 2025 – December 2025 | Contract | Remote / Johannesburg

- Engineered workflow modules for asset requests, approvals and incident reporting using ASP.NET MVC clean architecture.
- Built multi-role access control supporting Employees, Managers, Administrators, Finance and HR with secure C# backend logic and API endpoints.
- Optimised SQL stored procedures improving data retrieval performance by 40%.
- Built Razor Pages with DataTables, server-fetched JSON, export options and UI customisation for audit-ready reporting.
- Documented system features, data models, controller endpoints and approval flows for developer onboarding.

Software Developer

Ecoosty | August 2024 – August 2025 | Woodmead, South Africa

- Implemented Laravel Livewire authentication flows including password reset logic and real-time form handling.
- Migrated legacy UI components to a fully responsive utility-first design system while preserving controller functionality.
- Ensured cross-device compatibility maintaining clean component-driven fullstack code following modern Laravel conventions.

Financial Consultant

Old Mutual | May 2023 – March 2024 | Tembisa, South Africa

- Conducted financial needs analyses and recommended investment strategies aligned to client risk profiles.
- Consistently met and exceeded sales targets through networking, referrals and long-term relationship building.
- Provided ongoing portfolio reviews and proactive client support in compliance with regulatory requirements.

Call Centre Agent

Nedbank | June 2019 – May 2022 | Johannesburg, South Africa

- Handled high-volume inbound banking queries resolving account issues within SLA targets.
- Identified cross-sell and upsell opportunities contributing to revenue while maintaining compliance standards.
- Collaborated across departments to resolve complex customer cases and escalate appropriately.
